

# **Ukulele Chord-Strumming Practice Instructions**

## **Memorize the chords.**

For each chord you learn, make sure you remember where to put your fingers and also remember the name of the chord.

M = Major, m = minor, # = Sharp, ♭ = Flat, ♮ = Natural

## **Count out loud while you play.**

Make sure to count every beat: the ones you are strumming as well as the rests. (Usually “1 2 3 4”)

## **Play each line in the lesson 2 to 4 times.**

If you play a line twice and you are comfortable with each chord and switching from chord to chord, then you can stop, but if not, then play the line 1 to 2 more times.

## **You don't have to practice for a certain amount of time.**

Practice for however long it takes you to play each line in the lesson 2 to 4 times.

## **You should practice every day, but that's not always possible.**

You might not have time to practice on the day of your lesson, but you should try to practice all of the other days of the week. Practicing should be a part of your daily routine. There might be some other days when you are too busy to practice, but you should make sure to practice a minimum of 4 days every week.
